ASPHALT GAMES

DIFFICULTY: *EASY*

👥 5 VOLUNTEERS

🕐 2 HOURS

MATERIALS

PREP
9" Roller, pad, and tray
Concrete or asphalt primer
Roller extensions

PAINT
Porch and floor paint
Duct tape
1.5" Painter's tape
Paint cups
Latex gloves
Paint can opener
Stirring sticks
4" Roller, pad, and tray
Assorted brushes
Caution tape
Non-skid additive (optional)

TOOLS

PREP
Pressure washer/hose
Push broom

PAINT
Measuring tape
Pencil/chalk

PREP LIST

1. Sort all the materials into piles by like items to ensure you have materials needed to complete project. ☐

2. Wash the entire area with a pressure washer or hose with a high powered nozzle. Then sweep the area and let it dry completely. ☐

3. Prime the entire area using a clear concrete or asphalt primer and rollers with extensions. ☐

4. Notes about Conrete Primer: wear appropriate eye, skin, and apparel protection. Take care when applying primer because some surfaces may appear slightly darker after applying. Completely strip all coatings prior to use. Do not over apply or allow product to puddle. Remove puddles by spreading it out or wiping excess up with cloth. On vertical surfaces apply using an airless sprayer. Initial foaming may be observed, but will disappear upon drying. For touch-ups where surface coating has failed, competely remove any loose/peeling paint. New concrete must cure for mim of 30 days prior to priming and primer dries to the touch in 2-4hrs at 77°F and 50% humidity. Additional drying time is needed in cooler temps and higher humidity. ☐

PAINT LIST

1. Sort all the materials into piles by like items to ensure you have materials needed to complete project. ☐

2. Begin by brainstorming which Asphalt Game(s) you would like to do. Draw your ideas on scrap paper before you start. ☐

3. Be sure to prime the area with either asphalt or concrete primer. ☐

4. Outline your game with measuring tape, chalk, pencils, and/or tape. ☐

5. You may want to add a no-skid additive to keep the paint to prevent the painted area from being slippery when wet. ☐

6. Fill in colors first, and then go back after it's dry to add outlines and touch up any edges. ☐

7. Place caution tape around the painted area so no one walks through your masterpiece! ☐
